Portfolio: [View](#)

SUMMARY

MIS graduate with hands-on experience in Data Analytics and Business Intelligence developed through practical projects and intensive training at DEPI and NTI. Skilled in SQL, Power BI, Python, and Excel, with a strong focus on data cleaning, dimensional modeling, KPI tracking, customer segmentation, and automated data pipelines. Dedicated to transforming raw data into actionable insights that drive informed business decisions.

EDUCATION

Bachelor of Commerce – Management Information Systems (MIS) Alexandria University | 2021 – 2025

COURSES AND CERTIFICATES

- Data Analytics - Microsoft Power BI (DEPI) | 2024 – 2025
- HCIA-AI V4.0 Course Certificate | Huawei ICT Academy (Nov 2025)
- Data Analysis Training Program | National Telecommunication Institute (NTI) & Creativa Digital Egypt Innovation Hub (Mar 2026)

PROJECTS

Customer Behavioral Segmentation & RFM Analysis | SQL Server, Power BI

- Consolidated 12 months of transactional sales data via T-SQL (UNION ALL) and built analytical views utilizing NTILE(5) window functions to calculate and score Recency, Frequency, and Monetary (RFM) metrics.
- Engineered multi-tier segmentation logic to classify 287 customers into behavioral cohorts, identifying that ~26% were dormant (Hibernating) and ~22% were high-value (Champions) to inform retention strategies.
- Designed an interactive Power BI dashboard with dynamic slicers and granular customer drill-downs, providing actionable visibility into segment transitions and RFM cell patterns (e.g., 555 vs. 111).

Sales & Revenue Performance Dashboard | Excel, Power Query, Power Pivot

- Designed a relational Star Schema model in Power Pivot, linking a central Fact table (fOrders) to Customer, Product, and Calendar dimensions to enable multi-dimensional sales analysis.
- Authored advanced DAX measures using iterator functions (SUMX, AVERAGEX, RELATED, DATEDIFF) to evaluate core KPIs and operational efficiency, tracking an average delivery cycle of 5.5 days across 1,000 orders.
- Built an interactive Excel executive dashboard analyzing \$3.5M+ in revenue, uncovering category performance trends, peak ordering hours, and demand spikes across seasonal occasions.

Manufacturing Quality Control & Production Analytics Dashboard | Power BI, Power Query, Power BI Service, DAX, Google Sheets

- Architected an end-to-end data pipeline ingesting multi-sheet inspection logs from 3 specialized Google Forms deployed across 4 manufacturing production lines, leveraging Power Query (Append & ETL) to standardize data types and unify disjointed QC records into a single analytical model.
- Developed advanced DAX measures to calculate operational KPIs across 25,000+ inspected garment units, quantifying an overall 44.61% scrap rate, 11,000+ defective items, and 5 full production line downtime events to enable data-driven root-cause analysis.
- Deployed interactive Power BI dashboard to Power BI Service with a configured 8-hour scheduled refresh cycle, surfacing stage-specific failure points (Sewing ~49.16%, Finishing ~47.27%) and delivering near real-time operational oversight to shop-floor stakeholders.

SKILLS

Technical Skills

- **Languages & Tools:** SQL (T-SQL), Python, DAX, Power BI, Microsoft Excel, Power Automate (Cloud), SQL Server (SSMS)
- **Data Modeling & BI:** Star Schema, Dimensional Modeling, ETL (Power Query), Automated Data Pipelines (Cloud Flows), KPI Dashboards, Data Storytelling
- **Data Analytics:** Data Wrangling (Pandas, NumPy), Exploratory Data Analysis (EDA), RFM Segmentation, Data Quality & Cleaning

Soft Skills

Problem-Solving, Business Acumen, Cross-functional Collaboration, Analytical Thinking

LANGUAGES

- English: Professional Working Proficiency
- Arabic: Native
